

Equivalent ckt_2

Thursday, November 14, 2024 8:46 PM

$$\text{Bet}^n \text{ node } c \& e: 12\Omega \parallel 4\Omega = 3\Omega$$

$$\text{Bet}^n \text{ node } e \& d: 10\Omega \parallel 10\Omega = 5\Omega$$

$$\text{Bet}^n \text{ node } c \& f: 8\Omega \parallel 18\Omega = 4\Omega$$

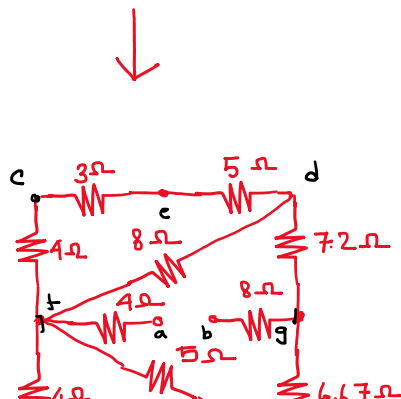

$$\text{Bet}^n \text{ node } f \& i: 8\Omega \parallel 18\Omega = 4\Omega$$

$$\text{Bet}^n \text{ node } i \& h: 6\Omega \parallel 4\Omega = 2.4\Omega$$

$$\text{Bet}^n \text{ node } h \& j: 9\Omega \parallel 6\Omega = 3.6\Omega$$

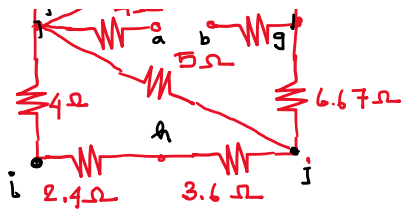

$$\text{Bet}^n \text{ node } j \& g: 10\Omega \parallel 20\Omega = 6.67\Omega$$

$$\text{Bet}^n \text{ node } d \& g: 12\Omega \parallel 18\Omega = 7.2\Omega$$

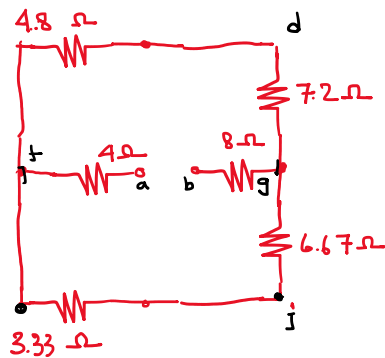

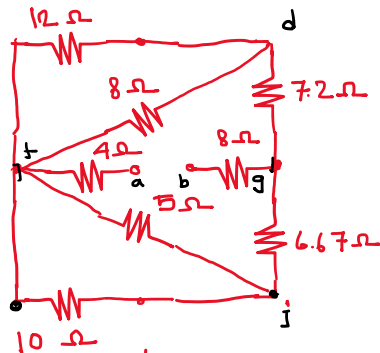

$$\text{Along } f \rightarrow c \rightarrow e \rightarrow d: 4\Omega + 3\Omega + 5\Omega = 12\Omega \text{ [Series]}$$

$$\text{Along } f \rightarrow i \rightarrow h \rightarrow j: 4\Omega + 2.4\Omega + 3.6\Omega = 10\Omega \text{ [Series]}$$

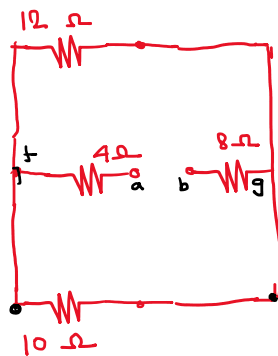

Between node f & d: $12\Omega \parallel 8\Omega = 4.8\Omega$

Between node f & j: $10\Omega \parallel 5\Omega = 3.33\Omega$

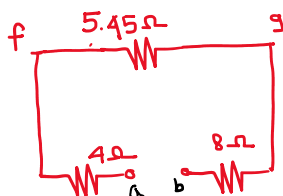

Along $f \rightarrow d \rightarrow g$: $4.8\Omega + 7.2\Omega = 12\Omega$ [Series]

Along $f \rightarrow j \rightarrow g$: $3.33\Omega + 6.67\Omega = 10\Omega$ [Series]

Between node f & g: $12\Omega \parallel 10\Omega = 5.45\Omega$

Along $a \rightarrow f \rightarrow g \rightarrow b$: $4\Omega + 5.45\Omega + 8\Omega = 17.45\Omega$ [Series]
