

Practice Problem

- A. Write a program in C to read n number of values in an array and display them in reverse order.
- B. Write a program in C to find the sum of all elements of an array.
- C. Write a program in C to find the product of all elements of an array.
- D. Write a program in C to find the sum/product of odd and even elements of an array.
- E. Write a program in C to find the index of an element.
- F. Write a program in C to copy the elements of one array into another array.
- G. Write a program in C to find the maximum element in an array.
- H. Write a program in C to find the minimum element in an array.

Practice Problem

- I. Write a program in C to find the second largest element in an array.
- J. Write a program in C to find the second smallest element in an array.

Try the above two with single pass

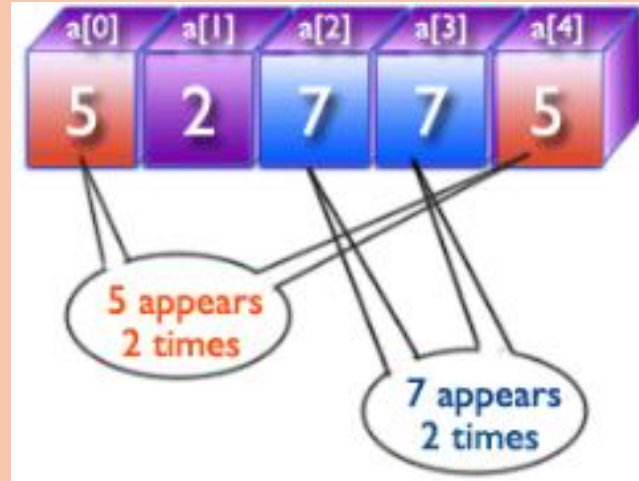

Practice Problem

K. Write a program in C to find how many times a specific number appears.

1	2	3	4	5	6	7	8
---	---	---	---	---	---	---	---

5 appears one times

Practice Problem

L. Write a program in C to count the total number of duplicate elements in an array. (frequency counter)

(Hint: Two loops → one starting from index – 0 and other starting from index – 1)
